

UNITED STATES OF AMERICA
FEDERAL ENERGY REGULATORY COMMISSION

Verdant Power, LLC

Project No. 12611-005

ERRATA NOTICE

(January 23, 2012)

On January 23, 2012, the Commission issued an “Order Issuing Pilot Project License” for the proposed Roosevelt Island Tidal Energy Project No. 12611.

The order is corrected as follows:

Paragraph 32 is changed to read “Under section 307(c)(3)(A) of the Coastal Zone Management Act (CZMA), the Commission cannot issue a license for a project within or affecting a state’s coastal zone unless the state CZMA agency concurs with the license applicant’s certification of consistency with the state’s CZMA program, or the agency’s concurrence is conclusively presumed by its failure to act within six months of its receipt of the applicant’s certification.¹”

Paragraph 33 is changed to read “On February 3, 2011, Verdant submitted a request for consistency determination to the New York State Department of State (New York DOS), which was received on February 7, 2011. By letter dated August 5, 2011, New York DOS issued Verdant the final determination of consistency with the New York Coastal Management Program, in which it concurred with Verdant’s consistency certification without prejudice.”

Jeff C. Wright
Director
Office of Energy Projects
